

Calling me on the telephone is just as much an intrusion on my privacy as physically entering my home unannounced. Indiana's Telephone Privacy Law is a great help in protecting me from unwanted intrusion. Please do not issue any regulation which will weaken this law in any way. If anything it should be greatly strengthened.

I believe that I should be able to prohibit all commercial calls that I did not specifically request even though I may be using or have used their services in the past, as well as any calls requesting donations, or any political candidate or organization, or from any religious organization other than from a church of which I am a member.
